

GiMA „P“ stamping gun with propellant charge

Very deep embossing for cast and steel parts • Mobile and ideal for large parts • Sharp or low-stress engraving • **NEW:** Hire or buy

Description:

Its functionality and design, as well as simple operation and maintenance, set the GiMA „P“ stamping gun apart from other products. In the GiMA „P“ stamping gun, you are receiving a powerful hand-held embossing device for deep, clean and safe embossing of metal and other hard materials.

Properties:

- Lightweight device with PE stamping head
- No connections necessary
- Low-recoil
- Weight: approx. 3.3 kg
- Automatic piston retraction
- Energy: Ring with ten propellant charges
- Integrated energy adjustment system
- Emboss up to 13 characters with one stroke
- Typeface heights of up to 12 mm possible
- Steel types engraved with letters, numbers, special characters or logos
- Versions with sharp or low-stress engraving
- Rapid type changeover with pin locking
- Simple positioning on flat and round materials
- 100% cartridge utilisation thanks to the „Winchester cartridge system“
- Clean – thanks to good ventilation
- The GiMA „P“ is equipped with comprehensive vibration protection
- The stamping head is now also available as an individual product
- no electrical or pneumatic connections necessary

The retrofit kit:

Do you have a P370 bolt-firing tool from the Spit company and want to retrofit it to create a stamping gun? Then we've got the perfect solution for you – the retrofit kit (**ref.:** 010642). Retrofit your device before going and buying a new one.

Individual, block and blind stamps:

The GIMA „P“ is equipped with steel stamps. Easily arrange your very own texts and serial numbers or use block stamps for recurring standard markings, such as material numbers or your company name and logos. Use blind stamps / space holders if you would like to emboss fewer characters. Available in various widths and typeface heights. Whether engraved sharp or as a low-stress solution.

Type dimensions	Number of characters	Max. typeface height
8 x 16 x 32 mm	8	12 mm
6,4 x 16 x 32 mm	10	10 mm
5,6 x 16 x 32 mm	11	10 mm
5,3 x 16 x 32 mm	12	10 mm
4,9 x 16 x 32 mm	13	8 mm

Other versions upon request.

Disc cartridges:

The GIMA „P“ stamping gun is operated with ten ring-shaped propellant charges per stroke. Choose between two cartridge types:

Brown: Standard cartridge for the most common materials.

Green: Strong version for harder materials.

Individual type holder:

Are you using too many types and don't know where to go next? Or you can never find the right types anymore? The individual type holder lets you store and sort up to 104 types. Available for standard dimensions of 8 x 16 x 32 mm and 5.3 x 16 x 32 mm.

Metal embossing head:

The metal head of high-quality steel is perfectly suitable for embossing hot materials.
