

All angles, Tilt Table, Antistatic

Product No. OP-006 502

Optilia's newly designed ESD-protected Tilt Table facilitates easy examination of PCB cards and other objects.

The Tilt Board provides the flexibility your examination needs and is designed mainly for use with Optilia's High Definition Inspection Camera Microscopes. The spherical solution provides movement in all directions and different angles.

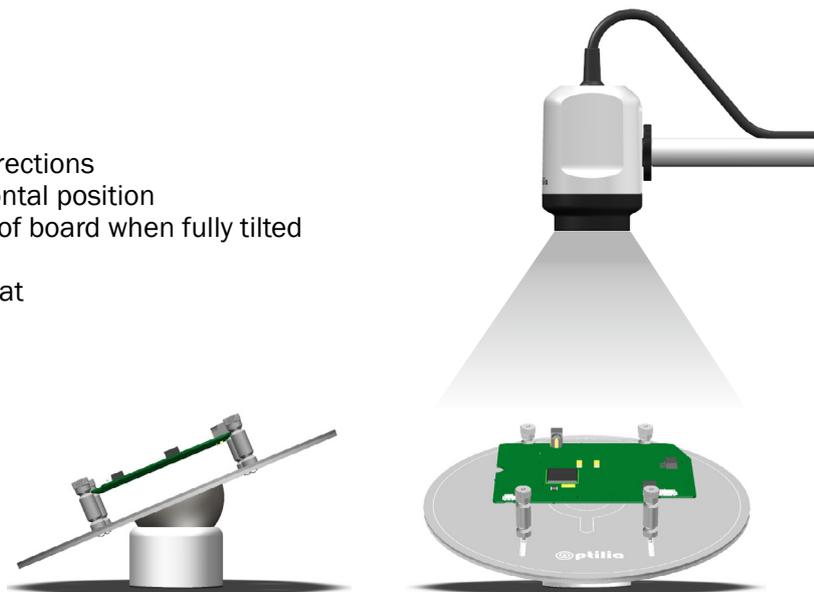

The four letterscrews is designed to simplify the fixation of your PCB object. Easily place the board through the tracks of the letterscrews and fix it by turning them. Now your examination is more effective.

The Tilt Board is portable and remains stable during use due to the low centre of gravity. The board may be tilted up to 30 degrees in any direction and the high friction ESD-mat keeps your inspection object in place.

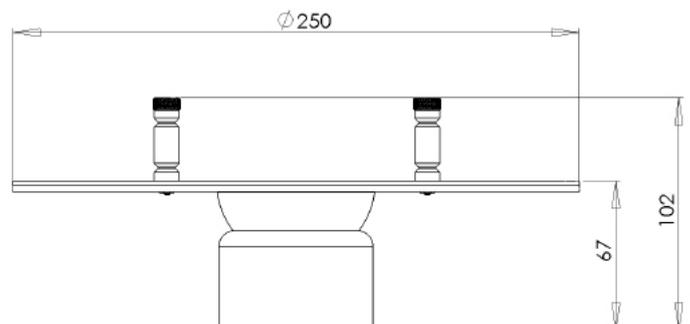

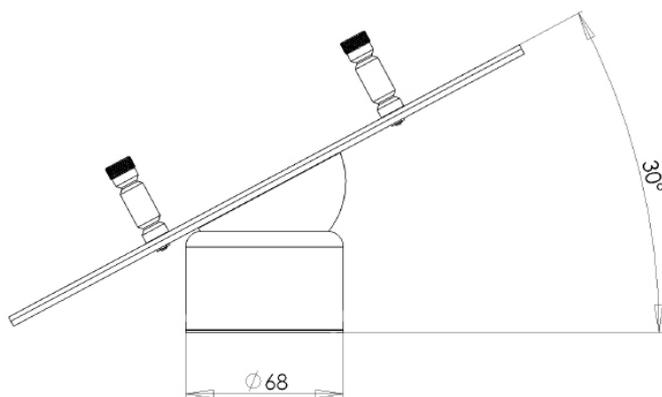

Technical specification:

- Size of board ○ Ø250mm
- Maximum tilt angle ○ 30 degrees all directions
- Height ○ 102mm at horizontal position
- Maximum height ○ 130mm from tip of board when fully tilted
- Weight ○ 1200 gr. max
- Surface material ○ ESD-protective mat
- Letterscrew material ○ Stainless Steel
