

HOT BONDERS

EV SERIES REPAIR SYSTEMS

Model: HCS9000B-EV (Single Zone)

**3 YEAR
WARRANTY**

*SUBJECT TO TERMS AND CONDITIONS

*The Most Dependable
Hot Bonders in the
Composite Repair Industry!*

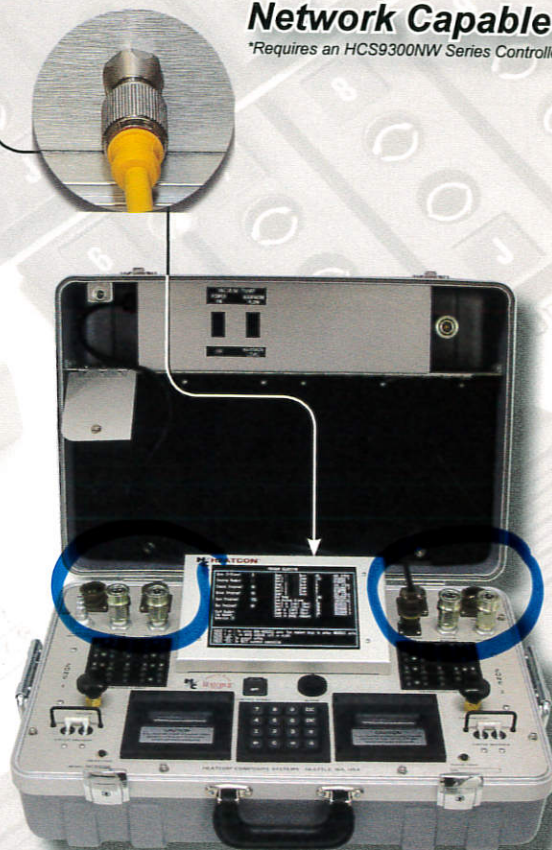

This line of HEATCON® Composite Repair Systems has a built-in vacuum system to allow easier mobility to the repair site and eliminates the need for a alternative air source.

The primary system application is composite and metal bond repairs, by heating and curing prepregs, resins or adhesives.

Manufacturing applications include secondary bonding processes normally accomplished with autoclaves or ovens. Hot bonders are also useful in R&D projects for materials and processes.

Network Capable*

*Requires an HCS9300NW Series Controller

Model: HCS9200B-EV (Dual Zone)
