## 2.3 Accessories

Standard;  
 HF pulser (type N95000  
 or **Bi-3 ISM-Y1**),

**Fig. 4** Meter body with optional different MF and HF frequency pulsers

**The MF pulser will give the opportunity to detect the flow direction in the Bi-Di type turbine**

These optional proximity sensor frequency pulsers are detecting pulses from either the blades of the rotor or from a reference disk underneath the index, in the turbine gas meter.
