

# LMFWG-1

## FLANGE CHECK

**Test Item: Flange Width**

### Details:

- With precise digital Mitutoyo indicator
- Able to export data to PC or SPC data collecting system
- Auto aligning the center of can body, adaptive to various can sizes
- Reliable design, constant measuring force and angle, no special operating experience is needed

### Description:

LMFWG-1-2-3, is used to measure the flange width of empty cans. Reliable design, invariableness measuring pressure and measuring angle which enable the inexperienced operators can also perform the measurement accurately. Auto aligning the center of can body, adaptive to various can sizes.

If purchased the adapter and cable, the gauges can be connected to a computer or SPC system for data collection, avoiding the manual recording and personal error

### Specifications:

Model	FWG-100	FWG-200	FWG-300
Measure Range	0-4mm		
Resolution	0.01mm		
Sample Can Dia.	50-90mm	50-200mm	50-300mm
Dimension	L242×W90×H125mm	L325×W125×H52mm	L425×W160×H52mm
