

Air Silencers and Breathers

Your configured part number: **MMP-250**

Features and Benefits

- **Reduce Noise and Prevent Contamination:**
 - MM, MMS, MML, and MMP silencers reduce exhaust noise by approximately 20%
 - MMB breathers prevent system contamination
- **Multiple Sizes for Multiple Applications:**
 - Available in #10-32 to 1/2 NPT port sizes
 - Sintered bronze elements
- **Integrated Flow Control Available:**
 - MMS Silencers are ideal for controlling valve exhaust flow
 - Space-efficient design mounts directly to exhaust ports
- **Multiple Materials Available:**
 - MML and MMP silencers feature corrosion-resistant plastic construction
 - MMP silencers feature a unique stem for use with tube collets

Engineering Specifications

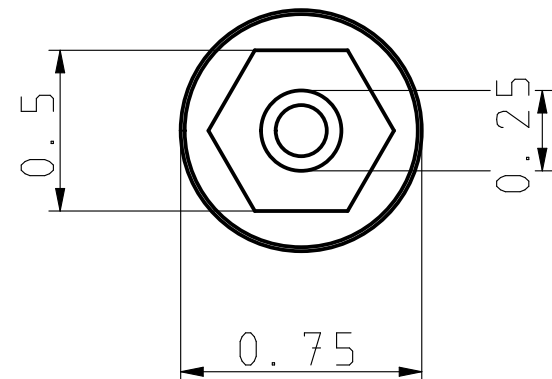

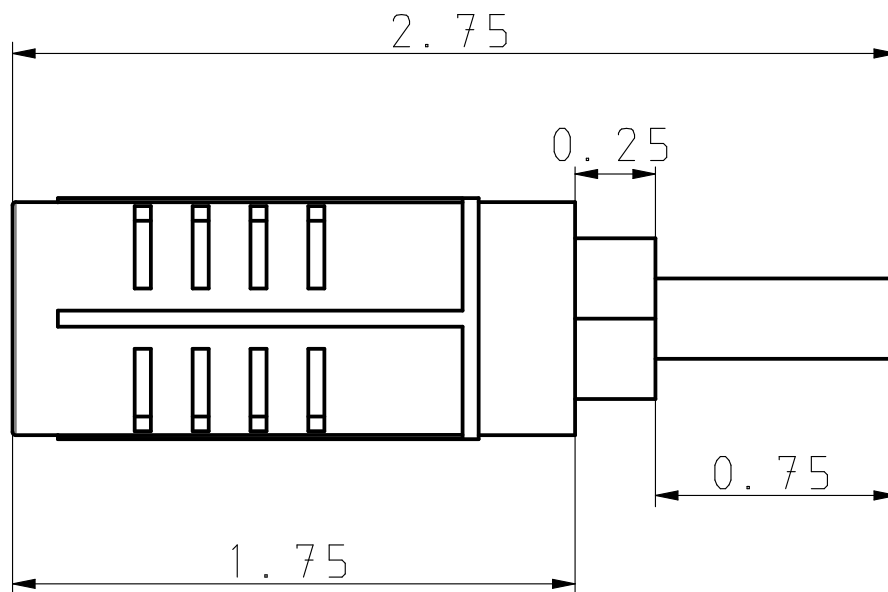

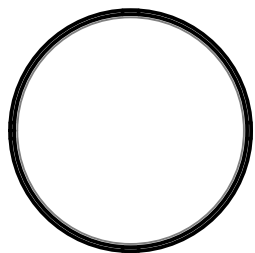

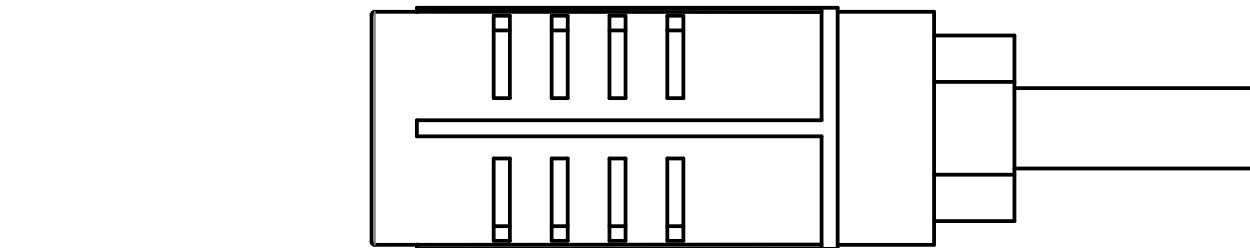

MM Series: Sintered bronze silencer with male threaded port
MMS Series: Silencer with flow control and male threaded port
MMB Series: Sintered bronze breather with male threaded port
MML Series: Silencer with plastic housing and male threaded port
MMP Series: Silencer with plastic housing and tube stem connection

Service and Design Capabilities

- **Experienced application engineers are available to provide complete pneumatic circuit solutions**
- **A full line of products from air preparation to valves, actuators, and specialty components is available**
- **Fast shipping and helpful customer service**
- **Custom design capabilities to meet your needs**
- **Call (877) MEAD-USA (877-632-3872)**
