

# Introducing New Generation of Portable Dewpoint Hygrometers

Experts in trace moisture measurement, Alpha Moisture Systems launches a powerful feature packed Dewpoint Hygrometer which offers fast & accurate measurement of dewpoint and moisture content in industrial gases and dry compressed air.

For over 25 years, Alpha Moisture Systems has developed, manufactured, supplied and serviced portable dewpoint hygrometers for laboratories, industrial process, power, semi-conductor, pharmaceutical, aerospace, nuclear and many other industries.

The latest development, in the form of **SADPmini2 & SADPmini2-Ex**, offers fast, accurate & reliable measurements consistently ensuring superior process control. The recently launched analysers have been designed using the latest technology offering many useful features, including on-board datalogging, wireless Bluetooth connectivity and very easy to operate menu driven interface.

- Full colour screen displaying multiple units simultaneously
- Desiccant Dry-Down Chamber for fast response
- Automatic Calibration
- Units selectable in °C, °F, ppm(v), ppm(w), g/m<sup>3</sup> or lb/MMSCF
- Display in choice of 10 languages
- Full data logging capability
- Real time logging with screenshot feature
- Wireless Bluetooth & USB connectivity
- View display screen on smart phone or tablet
- Wireless printing to dedicated printer
- Integral pressure calculator to display pressure dewpoints
- Easy to use with icons and intuitive control
- Strong, durable and rugged, IP66 construction
- Rechargeable batteries, 150 hours use in continuous operation
- Certificate of Test & Calibration
- Generous 2 Year Warranty

SADPmini2

**SADPmini2-Ex** Intrinsically Safe  
Certified to ATEX, IECEx & cULus listed.
